

General Assembly

ECMAScript 6

JavaScript Development
April 3rd, 2017

Hello!

- Pull changes from `svodnik/jsd6` repo to your computer
- Open the `es6` folder in your code editor

ECMAScript 6

Checkin on CRUD and Firebase:

- > The biggest challenge I have faced or anticipated facing with CRUD and Firebase is _____.
- > My biggest outstanding question about CRUD and Firebase is _____.

Learning Objectives

- Explain ES6 and why it's a significant update to JavaScript
- Expand your parameters with the spread operator
- Write a Node module utilizing the rest operator
- Deconstruct arrays and objects
- Simplify scope and `.this` with fat arrow functions

ECMAScript 6

Additional Resources

- Transpile your code from ES6 to ES5 with REPL:
<https://repl.it/languages/babel>
- Compatibility table:
<http://kangax.github.io/compat-table/es6/>
- freeCodeCamp introduces interactive ES6 challenges:
<http://beta.freecodecamp.com/>
- JavaScript ES6 Allonge:
<https://leanpub.com/javascriptallongesix/read>

Lab Time!

ECMAScript 6

Next class preview:

Continue working on your final projects.

Sasha and Nicole will be available for code review and pair programming.
